

Children's Vegetable Garden and Fruit Orchard

The Children's Vegetable Garden is a Tarrant County Master Gardener project where local 4th grade students have the chance to get their hands dirty and learn about growing and harvesting fruits and vegetables.

Every Wednesday a team of Master Gardeners show school children the ins and outs of a successful garden. Not only does the Children's Garden provide a gardening experience for kids, it also provides food for those in need. The produce harvested in the garden is donated to local charities for the homeless and disadvantaged.

So come by the vegetable garden to see some great people working for a great cause! We must keep the garden secured, or some of our wildlife wouldn't leave any produce for anyone else!

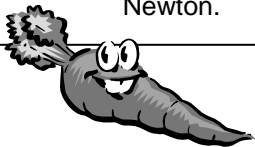

Make a list of things you might see growing in a garden. Mark them with a *V* (vegetable) or an *F* (fruit).
